Course Overview

In the future, digital literacy will be essential for success in any field. Whether you want to be a doctor, a lawyer, a teacher, or a business owner, you'll need to be able to use technology effectively.

That's why it's so important to start teaching digital literacy skills to students early. The units chosen for this course are designed to give students a solid foundation in Computing & IT. By learning how to design and build programs, understand data, and manage projects, students will be well-equipped to face the challenges of the future.

In addition to the technical skills, students will also develop a range of transferable skills, such as problem-solving, critical thinking, and teamwork. These skills will make them more well-rounded employees and give them a competitive edge in the job market.

You will learn through the use of a variety of software packages and a mixture of practical and theory sessions with the aim of developing knowledge, understanding and application.

Preparation for employment in the IT and digital sector is a key element of your learning.

What You Will Study

- Skills for Learning
- Team Challenge
- Designing a Product
- Creating a Product
- Going on a Visit
- Living with Online Technology
- Using Technology for a Purpose
- Managing Time

How You Will Be Assessed
